SUMMARY

Full Stack Developer & US Army Veteran with a focus on Java-driven backend efficiency and responsive UI architecture. Proven track record in streamlining real-time data synchronization and optimizing system performance. Leveraging a disciplined, mission-first approach to technical problem-solving and cross-functional team collaboration to deliver scalable, high-impact software solutions.

EXPERIENCE

Remote Junior Full Stack Developer

TAVRN (tavrn.quest)

January 2024 – Present, Remote

- Operated within a strictly version-controlled environment (Git), submitting Pull Requests for peer review and providing feedback on team members' code to maintain repository health.
- Collaborated with senior engineers to build responsive UI components using SvelteKit and TypeScript, ensuring strict adherence to the team's design system and linting rules.
- Integrated RESTful APIs and websocket endpoints into new and existing SvelteKit workflows, streamlining real-time data synchronization across multiple client interfaces.

Software Developer & AV Automation Specialist

ULTIMATE TECHNOLOGIES GROUP (UTG)

Apr 2021 – Dec 2025, Remote

- Developed a TypeScript and SQL-based logic engine to automate product bundling rules, streamlining the sales quoting process through programmatic logic.
- Engineered self-hosted n8n workflows via Docker to synchronize data between internal AV systems and external APIs.
- Wrote custom JavaScript within automation nodes to handle complex JSON data parsing and system integrations.
- Managed Azure SQL Pools to log automation performance and ensure data integrity via T-SQL queries and stored procedures.
- Integrated HubSpot CRM via REST API and webhooks to automate deal stage updates based on AV system triggers.
- Maintained and troubleshooted integrated AV/IT hardware and software systems to ensure seamless operational uptime.

Section Leader / Veteran

UNITED STATES ARMY

November 2018 – Present

- Broke down large logistical missions into manageable tasks, tracking progress and ensuring team accountability.
 - Managed inventory and operational workflows in high-stress environments, prioritizing efficiency and accuracy.
 - U.S. Army Veteran eligible and available to obtain a DoD security clearance.
-

EDUCATION

Computer Science

Universidad Autonoma de Santo Domingo • Dominican Republic

Certificate – Advanced Software Development in Full-Stack

Code Fellows • Seattle, WA

Associates in Media & Film Production

Bronx Community College • Bronx, NY

SKILLS

Java Enterprise Edition, Oracle Enterprise Edition, TypeScript, JavaScript (ES6+), Python, SQL (PostgreSQL, MySQL)

Bash, PowerShell, HTML5, CSS3/SASS, JSON, Linux

Next.js, React, SvelteKit, Node.js, REST API, GraphQL, Webhooks

n8n (Self-hosted & Cloud), Microsoft Power Automate, Azure Logic Apps, Zapier, Docker, AWS (EC2, Amplify), Microsoft Azure (SQL Pools), Vercel, Supabase, Git/GitHub, Linux, Ollama, RAG Implementation, HubSpot API, Zoom Admin Panel, Google Workspace
